First Sign® Retention Monitor

Address your Agency's Turnover Challenges with First Sign Retention Monitor

Our first-of-its-kind solution was built specifically for the law enforcement environment, where turnover is impacting 80% of agencies nationwide. Its powerful technology provides visibility into retention trends so agencies can implement proactive retention measures.

Track Trends in Retention Across the Agency. Turnover can be an agency-wide challenge or isolated to a particular department, rank, or tenure. Our technology can identify specific issues impacting retention as well as changes over time.

Identify Individual Officers at Risk of Leaving. Benchmark's predictive model proactively identifies officers at risk of leaving based on their characteristics and behaviors, giving agencies a chance to address their issues and retain them.

Implement Proactive Officer Support. First Sign Retention Monitor enables leaders to take a targeted approach, adjusting support and employment offerings at different phases of an officer's career to drive ongoing engagement.
